ENVIRONMENTAL POLICY

SICTA Kft. wishes to provide its customers continuously with reliable and quality products. SICTA Kft. assumes responsibility and commitment to complying with environmental, legal and other environmental protection related requirements, preventing environmental pollution and continuously improving the environmental performance of the enterprise.

To this end, it places priority emphasis on a green operation whose implementation is served by our environmental goals, appropriations and programs.

Within the context of our environmental mission we take on the following:

- The conscious application of environmental requirements for the repeated revision and continuous improvement of technological and operational processes within the premises of the enterprise.
- The environmental policy objectives are a part of the strategy of the Kft.
- Our main goal is to comply with legislation requirements as well as standards and authority provisions related to the activity and service of the Kft., we set our environmental objectives based on real and potential environmental impacts and we use resources provided to reach these efficiently and cost-effectively, our priority goal being the sustainable use of resources.
- In improving our processes we strive to integrate increasingly more modern and safer environmentally friendly technologies.
- We commit ourselves to preventing environmental pollution and enhancing our environmental performance continuously besides continuously reducing the unit volumes of our harmful substances and hazardous wastes and setting example for environmental protection for the surrounding enterprises and those operating in the same sector, our business partners and population.
- Development of thinking in terms of environment, which we wish to implement by continuous training and education for our staff members.
- Revision and optimisation of generation of our wastes and their handling within which we pay particular attention to separate waste collection, treatment of hazardous waste and recyclability of waste.
- Establishment and upkeep of a healthier and cleaner work environment whose maintenance is kept under our continuous supervision.

To implement all this, SICTA Kft. maintains, runs and develops an Environmental Management System, which is in compliance with requirements of **MSZ EN ISO 14001:2015** standard.

The management of the enterprise undertakes to conduct its activity according to guidelines of the environmental policy and expects all staff members to do so.

Also hereby we declare and publish our policy, the commitment to environmental protection for all staff members and stakeholders of the enterprise.

Jean-Francois Arondel
plant manager
